

The following procedure codes require prior authorization for Parkland Community Health Plan (PCHP) vision benefits administered by Avēsis. Submit prior authorization requests through the Avēsis provider portal or via fax. All requests must include supporting clinical documentation and applicable medical records.

Surgical & Procedural Codes (CPT)

Code	Description
66982	Complex extracapsular cataract removal with insertion of an intraocular lens (IOL) prosthesis (one-stage procedure) using manual or mechanical techniques, such as irrigation/aspiration or phacoemulsification
66984	Standard extracapsular cataract removal with insertion of a single-stage intraocular lens (IOL) prosthesis
66985	Insertion of intraocular lens prosthesis (secondary implant), not associated with concurrent cataract removal
67311	Strabismus surgery involving a recession or resection procedure on one horizontal eye muscle
67312	Strabismus surgery involving a recession or resection procedure performed on two horizontal muscles in a single eye to correct eye misalignment
67314	Strabismus surgical procedure performed on one vertical extraocular muscle—excluding the superior oblique—using either a recession or resection technique to correct eye misalignment
67316	Strabismus surgery involving the recession or resection of two or more vertical extraocular muscles (excluding the superior oblique) to correct eye misalignment, such as vertical strabismus, in one or both eyes
67318	Strabismus surgery performed on the superior oblique muscle
67331	Specialized strabismus surgery performed on a patient with a history of previous eye surgery or injury that did not involve the extraocular muscles
67332	Strabismus surgery performed on patients with extraocular muscle scarring (from previous injuries or surgeries) or restrictive myopathy (e.g., thyroid eye disease)
67901	Surgical procedure to repair a drooping upper eyelid (blepharoptosis) using the frontalis muscle technique,
67903	Repair of blepharoptosis (droopy eyelid) via (tarso) levator resection or advancement using an internal (conjunctival) approach
67904	Repair of blepharoptosis (drooping eyelid) via an external approach, specifically involving (tarso) levator resection or advancement
68761	Closure of the lacrimal punctum by plug, each
68810	Probing of the nasolacrimal duct, with or without irrigation
68811	Surgical procedure for probing the nasolacrimal duct (tear duct) to clear obstructions,
68815	Procedural, surgical insertion of a stent or tube into the nasolacrimal duct (tear duct) to relieve blockages

Injectable & Implantable Therapies (HCPCS J / Q Codes)

Code	Description
J0177	Eylea HD (aflibercept)
J0178	Eylea (aflibercept)
J0179	Beovu (brolucizumab-dbl)
J0585	Botox (onabotulinumtoxinA)
J1096	DEXTENZA (Dexamethasone, lacrimal ophthalmic insert, 0.4mg)
J2777	Vabysmo (Faricimab-svoa) injection
J2778	Lucentis (ranibizumab)
J2779	Susvimo (Ranibizumab) Ocular Implant
J2781	SYFOVRE (pegcetacoplan injection)
J2782	IZERVAY (Avacincaptad Pegol) Intravitreal Solution
J7313	Iluvien (fluocinolone acetonide, 0.01mg)
J7314	Yutiq (Fluocinolone acetonide, 0.18mg) intravitreal implant
J7351	Durysta (inj Bimatoprost ITC Implant, 10 mcg)
Q5128	CIMERLI® (ranibizumab-eqrn)
